## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 1\_Q6

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

Joey is learning about bitwise operations and is working on a project that involves extracting specific bits from integers. He needs to write a program that takes an integer and the number of bits N as input and outputs the value of the lowest N bits of the integer.

Help Joey in his project to understand and visualize how bitwise operations work in practical scenarios.

##### ***Input Format***

The first line of input consists of an integer X, representing the given integer.

The second line consists of an integer N, representing the number of bits to extract.

### **Output Format**

The output displays "Result: " followed by an integer representing the value of the lowest N bits of the given integer.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 85  
2

Output: Result: 1

### **Answer**

```
import java.io.*;  
import java.util.Scanner;  
  
class main{  
    public static void main(String[] args){  
        Scanner sc= new Scanner(System.in);  
        int x=sc.nextInt();  
        int n=sc.nextInt();  
        int m=(1<<n)-1;  
        int r=x & m;  
        System.out.println("Result: "+r);  
    }  
}
```

**Status : Correct**

**Marks : 10/10**
